Smart Card OEM Program

Solutions for Integrators, Software Vendors and Hardware Manufacturers

The Taglio™ Smart Card OEM Program is a turn key solution that enables IDM Integrators, Software Vendors and Card and Token Hardware manufacturers to bring to market a custom Microsoft Certified Minidriver product in record time, and at a highly competitive price. Whether you just need a custom branded solution or have deep technical requirements for complex PKI projects, the Taglio OEM Program has a solution for you.

Powerful, Proven, Technology
The Taglio OEM program is based on the proven, widely deployed C2 Series Card Technology and is certified by Microsoft. Taglio's solution provides powerful technology for both Enterprise and Consumer/Citizen projects.

Direct Sourcing from Multiple Card Vendors
Taglio enables partners to source their cards directly from a wide variety of card manufacturers, or to manufacture their own cards. Taglio provides partners with the tools to program and initialize their cards and ensures that customers don't get locked in to one card vendor.

Custom Requirements
Every customer and every project has different requirements. Partner can use the off-the-shelf C2 card profiles, configure their own card profiles, implement a custom look and feel, or Taglio can provide programming services for a fully custom solution.

Flexible Licensing
Taglio provides a flexible licensing program with a choice of per-card, per-user, site and source code licensing.

A Commitment to Partners
What really sets Taglio apart is the our commitment to our partners and our ability to deliver in-depth support to your marketing, sales, support and development teams.
Taglio Customer Projects

A Fortune 10 Enterprise uses the Taglio C2 for their corporate ID card program, and the Taglio OEM tools to securely program and initialize cards in-house.

A German Smart Card Solution Provider integrated Taglio C2 applets and Minidriver with their PKI software solution.

A Nordic card vendor integrated the C2 with their card offering and was able to deliver cards to customers in record time

A division of a Fortune 20 Telecom provider was able to deploy the Taglio C2 series throughout its data centers in just 2 weeks.

A Central American Smart Card integrator used the C2 OEM solution and Taglio custom development to bid a $45M public sector program.
