

C2 Series Minidriver Smart Card

Microsoft® Certified PKI Card Solution

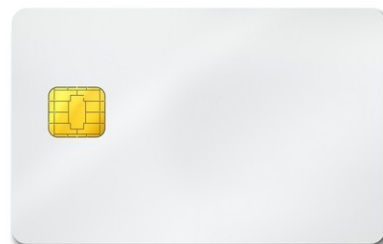

The Taglio™ C2 Series is a range of high performance Microsoft® Certified smart cards designed to provide out-of-the-box, standards-compliant support for computer security applications.

The Taglio C2 is a ready to use, off-the-shelf solution, complete with the on-card software and compatible drivers and middleware, and pre-initialized with the required keys and settings to use right away.

The Taglio C2 Series is Windows® certified. The Taglio C2 series was one of the first Minidriver solutions certified by Microsoft®. The C2 series is fully compatible with the Microsoft Windows Smart Card Framework (WSF) and supports Microsoft applications such as Windows Domain Log-On, VPN, Outlook®, secure Web access, and wireless LAN authentication.

The Taglio C2 Series supports thousands of Security Applications including Windows logon, Internet Explorer, Firefox Browser, email signing & encryption, disk encryption, Vand PN (SSL / IPSEC). Support for a variety of Smart Card management systems and Certificate Authorities is provided as well.

The Taglio C2 Series comes in a selection of versions, including dual interface (contact/contactless) cards.

Smart Card Minidriver

The Smart Card Minidriver is a technical specification developed by Microsoft™ that enables a compatible smart card to interoperate with the Windows systems and applications with a driver which can be automatically downloaded from the Microsoft web site using Plug and Play.

Smart Card Base CSP

The Microsoft Smart Card Base CSP is a cryptographic service provider integrated into the Microsoft Windows operating system which supports Smart Cards that provide a compatible smart Card Minidriver.
